PETER HENDERSON, STUMPP & WALTER CO. 48 CORTLANDT ST., NEW YORK 7, N. Y.

## **Peter Henderson, Stumpp & Walter Co.** TESTED SEEDS for MARKET GROWERS and FLORISTS 1952

We pay the transportation charges in the United States by Parcel Post, Express or Freight, **at our option**, on all Seeds except where otherwise noted.

ALL GOODS IN THIS CATALOG are offered subject to being unsold on receipt of order, and the prices quoted are subject to change without notice.

All advance orders for growing crops, are booked by us previous to harvesting and receipt—subject to crops permitting—and accidents or delays beyond our control. Should shortages necessitate it, we reserve the right to fill such orders pro rata.

THE PRICES QUOTED CANCEL ALL PRICE LISTS PREVIOUSLY ISSUED. The prices are net.

**ACCOUNTS**—We would be pleased to open charge accounts for the convenience of our customers. Kindly furnish references.

**REMITTANCES** should be made by Money Order, Bank Draft or Registered Letter. We must decline sending goods C. O. D. unless 25% of their value accompanies the order. If cash or stamps are sent by mail REGISTER THE LETTER. WE MAKE NO CHARGE FOR SHIPPING AND CARTING of goods to any railroad station, steamship line or express office in New York City proper.

WE MAKE NO CHARGE FOR PACKING, boxes, cases or barrels. Cloth bags we charge for, viz.: 1 peck, 20c; ½ bushel, 30c; 1 bushel, 35c; 2 bushels, 90c; Burlap bags, 1 peck, 20c; ½ bushel, 30c; 1 bushel, 40c; 2 bushels, 45c; 4 bushels, 50c; 6 bushels, 60c; 8 bushels, 80c. No charge for bags with lawn grass mixtures. Special packing of seeds for foreign shipments, when necessary, in tin-lined cases or double sacks we charge for at cost.

WE GUARANTEE THE SAFE ARRIVAL in the United States of all goods purchased from us.

Peter Henderson, Stumpp & Walter Co. warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container within recognized tolerances. Seller gives no other or further Warranty, express or implied.

## Special Announcement To Our Market Grower Customers

During the past year the two nationally known Metropolitan seed firms of Peter Henderson & Co. and Stumpp & Walter Co. formed a consolidation in order to better serve the gardeners of America. As a result of this consolidation, numerous savings in operation will be effected which will redound to the advantage of our customers.

It will at all times, as in the past, be our first consideration to furnish our customers with the highest quality strains of seed, consistent with the lowest possible prices.

#### **VEGETABLE SEEDS** 1952 INTRODUCTIONS OF GREAT MERIT

All of the varieties listed in this catalog were bred and selected with one object in mind, and that is to produce profitable crops for the commercial grower. Our offerings include the most desirable types for the long distance shipper, as well as those that appeal primarily to the local market trade. Whether your market is far or near, our seeds produce the crops that bring good returns.

- **BUSH BEAN, WADE, A.A.S. Gold Medal Winner 1952.** Top Quality—Heavy Yields— Smooth Appearance. This variety is resistant to common bean mosaic and powdery mildew. It has a deep green pod, 5½ to 6 inches long, round, slender, with reddish brown seed. It grows taller than Tendergreen, previous Gold Medal winner, holds its pods well up off the ground, and is a top quality bean with very heavy yields. It is ranked tops in marketability. It has a very smooth appearance, desirable for processing as well as for market or home use. It is classed as a slow-wilting type, losing water content slower than the average variety. Lb. **75c;** 15 Lbs. **\$7.50;** 100 Lbs. **\$45.00.**
- CARROT, IMPERIDA. A New Bunching Carrot Developed at Parma Branch of the Idaho Agricultural Experiment Station. Under southwestern Idaho growing conditions on irrigated land of good fertility, Imperida reaches suitable bunching size in 95 to 100 days, at which time its short, strong tops reach an average of 12 to 15 inches in length. Imperator grown in the same fields under the same conditions has tops averaging 20 to 24 inches. The roots of Imperida are slightly longer than those of Imperator. For example, in trials where the average length of Imperator was 7¼ inches, the average for Imperida was 8 inches. Imperida roots are long-conical in shape, with predominately square shoulders. As a shipping variety, its short tops will tend to eliminate the difficulties frequently encountered in the commercial packing of Imperator types which have been produced on soils of high fertility. For this reason, and because of the high quality of its roots, Imperida will probably find ready acceptance wherever the Imperator variety is now used as a shipping carrot. Oz. 50c; ¼ Lb. \$1.25; Lb. \$3.35; 10 Lb. \$33.00.
   CUCUMBER, NIAGARA. This important new mosaic resistant variety was bred by Dr.
- CUCUMBER, NIAGARA. This important new mosaic resistant variety was bred by Dr. H. M. Munger of Cornell. It stands up well in seasons when other varieties have been ruined by mosaic. This excellent slicer has fruits of good length, smooth, almost without taper, round-ended and well colored. Oz. 50c; 1/4 Lb. \$1.50; Lb. \$4.00; 10 Lbs. \$39.50.
- CUCUMBER, SURECROP HYBRID, A.A.S. Bronze Medal Winner, Early—Heavy Yielder —Resistant to Downy Mildew and Mosaic. This attractive white slicer holds its dark green color well after picking. Fruits 8 to 9 inches in length by 2½ inches in diameter. Slender and blunt ended. The flesh is crisp, tender and unusually good flavor. The fruits are very uniform in size and color. Surecrop bears over a long season and it makes a profitable local market seller. Season 58 days. ½ Oz. \$2.00; Oz. \$3.75; ¼ Lb. \$11.50; Lb. \$35.00.
- Oz. \$3.75; <sup>1</sup>/<sub>4</sub> Lb. \$11.50; Lb. \$35.00. **MUSKMELON, GOLDEN DELIGHT, A.A.S. Bronze Medal Winner. Larger—More At**tractive Than Bender's Surprise. The fruits are elongated, 4 to 5 by 5 to 7 inches with thick salmon or orange flesh which is firmer than most melons in this class. The flavor and general quality is superior to Pride of Wisconsin or Pride of Colorado. The fruits are also larger and somewhat earlier in maturing than those varieties. The skin color is slate gray, turning to a fairly deep yellow at maturity. The ribs are wide and shallow with open netting, and the shape is somewhat tapering at the blossom end. Season 92 days. Oz. 70c; <sup>1</sup>/<sub>4</sub> Lb. \$2.00; Lb: \$6.25; 10 Lbs. \$61.50.
- ONION ESPANOLA, YELLOW SWEET SPANISH (Utah Strain). The handsomest and mildest large onion in the world. Colorado, Oregon, Utah, wherever the market wants a large Spanish Onion, then the demand is for our Utah Strain. Our rapidly expanding sales in such territories offers most satisfying proof that we have the best onion for the soil, the climate and the market. This Utah Strain was developed from the original Spanish stock, and in addition to being well adapted to American conditions, it has better keeping qualities, and it is an excellent shipper. The bulbs are very large, globular in shape with an attractive amber-orange skin. The flesh is white, firm and solid. Season 105 days. Oz. 90c.; ¼ Lb. \$2.65; Lb. \$6.75; 10 Lbs. \$65.00.
- Espanola Onion. 1. Note the vigorous growth and uniform seed heads; 2. Harvesting the seed; 3. Seed being processed for drying; 4. Seed is dried by the brilliant sunshine. 5. Note the perfect symmetry of the finished onion.

AMERICAN SPINACH

## VEGETABLE SEEDS 1952 INTRODUCTIONS OF GREAT MERIT

- ONION, HYBRID ASGROW Y-40, Heavy Yields Earlier with Greater Uniformity. Hybrid vigor when applied to onions means added earliness, hardiness, and greater uniformity with heavier yields. Asgrow Y-40 is an early, mild, sweet onion of globular shape with a tan-yellow skin and firm white flesh. Season 90 days. Oz. \$1.85; 1/4 Lb. \$5.00; Lb. \$15.00.
- PEPPER, VINEDALE, A.A.S. Bronze Medal Winner 1952. This new variety matures a few days later than Harris Early. It is slightly larger than that well-known variety, smoother and thicker walled. The very attractive fruits measure about 4 by 2 inches with blunt ends and very thick walls for such an early variety. The plants are dwarf in habit and good croppers. Oz. \$2.75; ¼Lb, \$8.00; Lb, \$24.00.
- SPINACH, AMERICA. Bloomsdale Extra Longstanding Dark Green. A.A.S. Silver Medal Winner for 1952. SPINACH AMERICA is a cross between Bloomsdale Longstanding Darkgreen and our Viking. Plant height 6-8 inches, plant width 10-12 inches. Very thick-leaved, real glossy darkgreen, very well savoyed. The longest standing, heaviest yielding Spinach of them all, which at time of full maturity still has an excellent flavor. SPINACH AMERICA takes about 50 days to reach cutting stage and gives optimum production about 62 days after seeding. It has stood 75 days (after seeding date) without objectionable bolting, giving the vegetable grower a long harvesting season of large plants. ALL IN ALL SPINACH AMERICA (Bloomsdale Extra Longstanding, Darkgreen) IS THE BEST LONGSTANDING, HEAT RESISTING, HEAVY YIELDING, SAVOY-LEAVED SPINACH ON THE MARKET AT PRESENT. Lb. 75c; 10 Lb. \$6.50; 25 Lb. \$15.75; 100 Lb. \$60.00.
- TOMATO, QUEENS. A New Early Market Variety by the Originator of RUTGERS. Early-Smooth-Deep Globe-Reasonably Free from Cracks. Developed by Professor Lyman G. Schermerhorn of the New Jersey Agricultural Experiment Station, Queens is the outcome of a cross between Valiant and Rutgers. This final product is a variety combining earliness, smooth fruits with a deep globe shape, and reasonably free from cracks. The foliage is intermediate between the small foliage of Valiant and the heavy foliage of Rutgers with a uniformity of productiveness and type of plant. In season "Queens" will ripen the peak of its crop about one week later than the peak picking of Valiant and at least a week or ten days earlier than Rutgers. One characteristic of "Queens" is the firmness of the fruit whether picked on the blush or red ripe, which should make it carry well in the containers and attract the attention of the consumers on the roadside stand or in the retail store. The fruits are medium in size, deep globe in shape, measuring 2.41 inches on the vertical diameter and 2.59 on the horizontal diameter. The average weight of the fruits is 4.95 ounces. The fruit has a thick outer wall and inner walls, with small seed cavities that may account for the hard, firm feel of the fruits. The flavor of the fruit is very pleasing and it is suggested as an early market variety for staking or natural culture. 1/2 Oz. \$1.50; Oz. \$2.50; 1/4 Lb. \$7.00; Lb. \$20.00.
- TOMATO, HYBRID EARLY SENSATION. First Fruits Set 60 Days After Plant Setting. This new hybrid has not only earliness to commend it; it is also a heavy cropper and the fruits are of good uniform size. The fruits weigh 4 to 5 ounces each, and are carried in clusters of 4 or more. They are deep globe in shape and bright rich scarlet in color. Pkt. (100 seeds) \$1.00; ½ Oz. \$4.75; ¼ Oz. \$8.75; ½ Oz. \$17.00; Oz. \$32.00.
- WATERMELON, NEW HAMPSHIRE MIDGET, A.A.S. Gold Medal Winner. This New Watermelon Is No Bigger Than a Cantaloupe. New Hampshire Midget has made a hit on many local markets. At the New York Stork Club it created a sensation when halved and served like grapefruit. The fruits are oval in shape and measure about 6 inches across. They weigh about 2½ lbs. The rind is light green with irregular stripings and very thin. The flesh is bright red, solid and sweet. The seeds are jet black. The plants are very productive and yield a melon on almost every six inches of vine. Two hundred melons from every one hundred foot of vine is not unusual. The fruits mature in 65 days, thus making this variety ideal for Northern Planting. They can be shipped if handled in muskmelon crates. Oz. 70c; ¼ Lb. \$1.85; Lb. \$5.00.

<b>PEAS</b> Early Delicious. An extra early variety of outstanding merit. The vines grow about 2 feet high and produce an enormous crop. The pods are 3 to 31/4 inches long, straight, pointed, dark green, and contain 7 to 8 deep green peas of good quality. In season Early Deli- cious is ready practically as soon as Alaska, and has the added advan- tage of being more productive, larger podded, and above all, of much higher quality. The seed is semi-smooth, or dimpled and for this reason can be planted earlier	1 Lb.	15 Lbs.	100 Lbs.		
than is possible for the wrinkled varieties. Giants of California. A very early-flowering class with the branching habit of the Bis- marcks by producing large flowers on longer stems. It is a definite improvement and is				
now rated by the florist as the acme of branching stocks. <b>Santa Maria</b> , White. <b>Mixed</b> . Each.	.50	1.00	3.50	
Early Giant Imperial. (Improved Bismarck). We have found this strain so far superior to the Giant Perfection type that we have decided to discard the latter. Antique Cop- per, Hellebore-red; Apple Blossom, Blush- pink; Blood-Red, Deep red; Buttercup, Rich deep yellow; Chamois-Rose, Pale rose; Dark Blue; Elk's Pride, Royal purple; Lavender; Bose Deep rose-pink: Shacta New giant				
Rose, Deep rose-pink; Shasta, New giant white; Mixture. All colors. Each Non-Branching. We are pleased to be able to offer to the florists this wonderful strain producing true one-stalk plants. The indi- vidual flower-spikes are erect and produce from 15 to 20 improved blooms.	.50	1.00	3.50	
White Varieties Pure White. Our best pure white. Large florets and well-formed compact spikes. Gardenia. An outstanding white. Late blooming.				
Pink, Red and Rose Varieties American Beauty, similar to the American				
Beauty Rose. Ball Supreme, rich silvery rose. Extra- long, heavy spikes. Chamois-Rose. Blending of creamy buff				
and pink. Deep Rose, Bright rose-pink.				
Ruby, Crimson-red; fine long stems. Blue, Lavender and Purple Varieties Ball Blue. Rich lilac shade.				
Lilac-Lavender. The most popular variety in this shade. Purple. Deep purple with long stems.				
Silvery Lilac. A very attractive shade. Miscellaneous Varieties				
<b>Deep Apricot.</b> In our estimation this is one of the best varieties of this popular flor- ist flower. We feel sure it will prove very satisfactory in the cut-flower market. The flowers are very large, have long stems and are a beautiful shade of deep apricot.				
Yellow Wonder. Deep creamy yellow.				
<b>Mixed.</b> A special mixture consisting of all the popular colors.

Mixed	.55	1.75	5.50

Early-Flowering Spencer Novelties. Modern Sweet Peas have been developed to meet al-most every grower's needs. This new springmost every grower's needs. This new spring-flowering class should be preferred for green-house sowing from now on because of the bet-ter stem length plus the fact that they will last longer into the spring than the weaker-growing winter varieties. This group should also prove valuable for outdoor sowing in the fall in those parts of the Gulf States where spring temperatures are not too high.

emperatures are not too high. Ball Orange Improved. Brilliant Orange. Ball Rose Improved. Glowing Rose. Bridesmaid. Deep silvery pink; long stems. Daphne. Soft salmon-pink on cream ground. Fiesta.
